

About GaussSteady®

GaussSteady is a lightweight, comfortable device worn on the ear(s) like headphones that may help to reduce dizziness, ease nausea, and improve balance using groundbreaking magnetic technology.

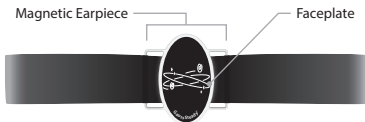

Gauss magnetic therapy involves applying magnets to specific areas, enhancing blood flow and oxygenation to the inner ear. This process helps regulate the vestibular system, which is responsible for balance. By improving circulation and reducing stress, magnetic therapy may help ease or eliminate vertigo symptoms, so you can get back to doing what you love.

The GaussSteady headband fits most adults. For best results, wear GaussSteady as often as possible—anytime, day or night. You can even wear it while you sleep. Read complete user guide before use.

IMPORTANT

Before using GaussSteady, read disclaimer information on the back panel.

GaussSteady® User Guide

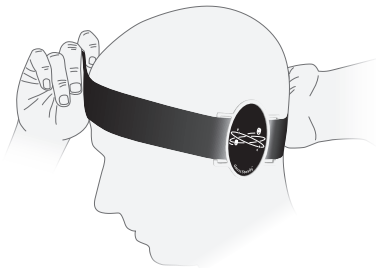

GaussSteady can be used on one or both ears. For a single ear, use one magnetic earpiece with the headband. For both ears, use one earpiece on each ear with one headband.

Continue medication as prescribed while wearing GaussSteady.

1. Place the oval disc over affected ear(s).

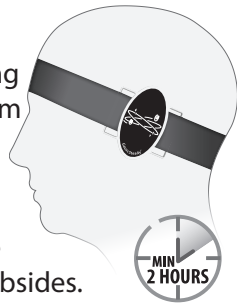

2. Adjust the headband strap until it is comfortable to wear.

3. Secure the headband with the hook and loop fastener.

4. We recommend wearing GaussSteady a minimum of two hours per day, though wearing it for longer periods may be more helpful. Continue use until the vertigo subsides.

GaussSteady can be worn during the day or night—even while you sleep.

Use GaussSteady at least four weeks before deciding if the vertigo is relieved.

Wash the headband as needed. Remove magnetic earpiece(s) prior to washing.
